of censure, but also as a vote of want of confidence, and fixes the discussion for Thursday next. This action of fr. Disraelt was responded to by cheers and counter

THE EMPEROR'S PROGRESS.

A VISIT OF THE BOYAL PARTY TO THE CHI-CAGO WATER WORKS-FOUR LADY INTERVIEW ERS BESIEGE THE EMPEROR-A STORY WITH

The Emperor and suite arrived this morning at a quarter past seven at Chicago. Notwithstanding that rain was falling and the waters of the lake somewhat rough, His Majesty persisted in his intention to visit the crib, in order to be able to form a correct idea of the Chicago water supply. Carriages were waiting at Canal street station and the Imperial party were at once driven down to the banks of the river, where Mr. Chessborough, the City Engineer, had a steam tug ready to convey His Majesty to his destination. The sail out was far from agreeable, owing to the rain and foggy weather on the lake. Mr. Chessborough accompanied the Emperor and explained the plan and working of the Water Works. When the inspection was completed His Majesty was conveyed in the tug boat to the railway station.

The Emperor has been much interested in the country through which he has passed. Since he has left Omaha he is surprised to find the land so thickly populated and so many and so populous towns along the

This afternoon four enterprising American ladies connected in some way with the Contennial succeeded in obtaining an interview with the Emperor. They were headed by Mrs. Willing, editress of the Women's Temperance Union. His Majesty was curious to see the lady representatives of the press, and received them very kindly. The interview promised well at the be-ginning, but it turned out that only two of the ladies ginning, but it turned out that only two of the ladies belonged to the press, while the others were merely curious. One of these incidentally remarked that she had been anxious to see the Emperor of Brazil because a relation of hers was one of His Majesty's subjects. With his usual political this relation dwelt, when the lady inno of Brazil this relation dwelt, when the lady innocontly replied that she thought it was in Valparaiso.
With a wicked smile, the Emperor reminded her that
Valparaiso was not in his dominions, but in Chili, and the lady seemed quite disconcerted; but the effect of the blunder on the literary ladies was terrific. It fell like a comosnent, and, like a clever tacticals, Ark wil-likg rose, and with a pretty speech withdrew, her com-panions evidently afraid that terrible Valparaiso woman would epeak again and make a new blunder. This acci-dent delivered His Majesty from the terrible lady inter-viewers. The royal party will arrive at Pittsburg to-night and proceed at once by special train to Oil City to inspect the petroleum works.

CUSTER SACRIFICED

Interception in Chicago by the President's Order.

STRIPPED OF HIS COMMAND

The Indian Expedition To Go Forward Without Him.

CÆSAR'S SPLEEN.

CHICAGO, May 5, 1876 The despatches from Washington appearing in Western papers to-day, stating that orders have been issued from the War Department directing General Custer to resume his command, and that the Indian expedition from Dakota had started, are incorrect. Despatches were received by Sheridan at military headquarters in this city yesterday from General Sherman, stating that gent insists that Custer shall not resume his

Custer reached Chicago yesterday morning, es route to join his command in Dakota. While in the cars at the depot, and about to start for St. Paul, a staff officer of General Sheridan's entered and informed him that he was wanted at the General's headquarters. Upon repairing thither Custer was notified by Sheridan that the latter had orders from Washington to intercept him as he passed orders from Washington, and in the meantime Sheri-dan was ordered to start the Indian expedition without

The despatch to Sheridan contained no charges against Custer, except that he had left Washington without seeing the President. Custer at once telegraphed Sherman that he had spent the entire day before leaving Washington, from ten until three o'clock, in the reception room at the White House, seeking an audience with the President, but the latter sent him word at three o'clock declining to grant an interview. Custer then called at Sherman's headquarters, but Sherman was in New York.

General Sheridan, after detaining Custer here unde orders from Washington, telegraphed the fact to Sher-man. Orders were telegraphed to Sheridan last night, instructing him to permit Custer to proceed to Fori Lincoln, Custer's headquarters, but, by the President's directions, not to permit Custer to accompany the ex-pedition shortly to move against the hostile Indians, which expedition embraces all of Custer's troops, and the orders for him to proceed to Fort Lincoln under these circumstances leave him stripped of his logitimate command.

Inquiry among the military here fails to discover any cause or pretence for this course beyond the fact that the President orders it. Custer left this city this morning for St. Paul and

WHAT IS SAID IN WASHINGTON.

WASHINGTON, May 5, 1876. Custer from his command because he was a witness in the Belknap impeachment trial is officially denied. On the contrary, it was the wish of the President that General Custer, having been subprenaed as a witness, should remain until he had testified, and that meantime the Indian expedition should be placed under

mand of some other officer. General Sherman is most emphatic in saying that impeachment managers, was not justified in leaving Washington without notifying the President or himself War nor General Sherman "protested" against reliev-ing General Custer, nor did General Sherman say that General Custer was "not only the best, but the only man" fit to lead the expedition. The army, General Sherman says, possesses hundreds who are as competent for the command of such an expedition as General Custer.

WAS HE A VOLUNTARY WITNESS OR NO?-THE QUESTION SATISFACTORILY SETTLED—WHY HE

TO THE EDITOR OF THE HERALD :nistration organs throughout the country have repeated the statement originated by Belknap and his friends in Washington, that General Custer left his command in Dakota and came to Washington a volun-tary witness. The Hartford Courant of the 3d inst.

He (Cauter) was a very swift witness, with nothing of any value as evidence. Meanwhile, at the post which he had left an important expedition was fixting out against boxile Indians. Had he been as anxious to attend to his duties as he was to play the gossip he would have superintended the ostift and taken command of the expedition. Being absent, the President has relieved him from duty and ordered him to report to the regiment of which he is lieutenant colonel, and will appoint some other officer to take charge of the command. The President has done exactly right.
